

Exhibit A

In the Claims:

a¹

--23. (NEW) An X-ray diagnostic apparatus comprising:
an X-ray generating portion configured to irradiate an X-ray to a subject;
a solid state detecting portion formed by plural solid state detecting elements and
configured to detect the X-ray irradiated from the X-ray generating portion and
movably provided independently of the X-ray generating portion; and
a holding mechanism configured to hold the solid state detecting portion such that the
solid state detecting portion is horizontally movable, pivotable on a vertical axis,
pivotable on a horizontal axis which crosses the vertical axis and rotatable
about an axis which crosses the horizontal axis and is parallel to a detecting
plane of the solid state detecting portion,
wherein the X-ray generating portion comprises at least one of an X-ray generating
portion for a below-table tube capable of imaging in a style of below-table tube
and an X-ray generating portion for an over-table tube capable of imaging in a
style of over-table tube.--

--24. (New) An X-ray diagnostic apparatus comprising:
an X-ray generating portion configured to irradiate an X-ray to a subject;
a radiation receptor for electronic image storage and configured to detect the X-ray
irradiated from the X-ray generating portion and movably provided
independently of the X-ray generating portion; and
a holding mechanism configured to hold the radiation receptor for electronic image
storage such that the radiation receptor for electronic image storage is
horizontally movable, pivotable on a vertical axis, pivotable on a horizontal axis
which crosses the vertical axis and rotatable about an axis which crosses the
horizontal axis and is parallel to a detecting plane of the radiation receptor for
electronic image storage,
wherein the X-ray generating portion comprises at least one of an X-ray generating
portion for a below-table tube capable of imaging in a style of below-table tube

*Concluded
As*

and an X-ray generating portion for an over-table tube capable of imaging in a
style of over-table tube.
